For safety information, refer to the Important Safety Instructions enclosed in the carton.

Contents

- A. SoundDock® XT speaker
- B. AC power supply
- C. Adapters

Getting Started

Before you begin, place the speaker on a firm and level surface.

- 1

Plug the cord from the AC power supply into the **POWER** connector on the rear of the speaker.
- 2

Slide on the AC power adapter for your region. Plug the AC power supply into an AC (mains) power outlet. You will hear a short tone indicating that a power connection has been made.
- 3

Firmly insert your iPod or iPhone into the dock. The iPod or iPhone charges while docked.
Note: You may need to remove your iPod or iPhone case in order to properly dock the device.

Playing music: Open a music app on your iPod or iPhone and use the onscreen menu to select, play, and pause music.

Adjusting the volume: Touch the + or - buttons on the front of the speaker, or use the volume controls on your iPod or iPhone.

Connecting another source
Connect another source to the **AUX IN** connector on the rear of the speaker, using a 3.5 mm audio cable (not provided).

To ensure optimal volume control from the SoundDock XT speaker, set the source volume to 75% of maximum.

To play the AUX source (if you also have a docked iPod or iPhone), pause the music on the iPod or iPhone, or exit the music app, then press and hold the + and – buttons at the same time for two seconds. Repeat to switch back to the docked iPod or iPhone.

Troubleshooting

iPod or iPhone does not dock properly or will not charge:

- Check for obstructions in the dock connectors and re-seat your iPod or iPhone.
- Remove your iPod or iPhone case.

No sound/low sound:

- Make sure the speaker has AC power.
- Turn the speaker volume up and ensure the source is playing. Adjust the volume using the + and - buttons on the speaker, or the volume controls on the iPod or iPhone.
- Remove the iPod or iPhone from the dock for five seconds, then firmly re-seat it.
- If you are using an AUX source, set its volume to 75% of maximum.
- Unplug the power cord for 15 seconds, then plug it back in. This resets the speaker.

Technical Information

Size and Weight

5.3" H x 11.8" W x 3.4" D
(13.4 cm x 30 cm x 8.6 cm)
2.6 lb (1 kg)

Complete for Your Records

Please complete and retain for your records.
